Letter to the Editor

Subject: Gross pay = net pay with the FairTax

Title: Save the Middle Class

Dear Editor:

As a hardworking employee, I have always been dismayed at how much money I don't take home due to federal income and payroll taxes. Americans For Fair Taxation is proposing a consumer-oriented and fair tax proposal that will benefit taxpayers, not the IRS. The middle class, the majority of the population, will be better off under this new tax system. They, not the government, will control the amount they pay in taxes, because they control what and how much they purchase. The FairTax will continue to fund government at its current level so that government programs will continue to be funded and Social Security and Medicare benefits will continue just like they did before.

The middle class will not be the only ones to benefit from the FairTax, because poverty-level Americans will pay no federal tax at all. They will no longer pay the highly regressive payroll tax imposed on the very first dollar earned.

Every American should call 1-800-FAIRTAX, or visit the Web site at www.FairTax.org to receive more information about this innovative tax reform proposal that will greatly help hardworking Americans to take home more of the money they earn.
