

With your help we can eliminate all federal income taxes, all individual federal income tax filings, all corporate taxes, capital gains taxes, the "death tax", federal payroll taxes, the marriage penalty, the Alternative Minimum Tax and the power of Congress to manipulate the tax code for lobbyists, pet projects and favored constituents. We can end the error of seeing massive borrowing and spending as "free money" and enable a new era of American economic growth.

What Happens to Job Growth, Stocks, Capital Formation, Investment and Savings with the FairTax?

Think of it as the World's Biggest Economic Jumper Cables.

It's called the FairTax and the idea is rapidly gaining ground outside Washington. It's a non-partisan national retail sales tax with protections for the poor and middle class that replaces every penny now raised through income taxes.

Because pending FairTax legislation (H.R. 25) shifts the power of taxation away from tax-writing committees in Congress, the American public must overcome Congressional, special interest and lobby resistance. With more than 50 co-sponsors, we're on our way.

Enactment Depends on Organizing and Activating the Voice of the American People
